		experience for their proposed share of work (as per sl. No 4.1) shall not be considered as a Consortium member.	the experience requirement mentioned in sl. no. 4.1 of the eligibility criteria in case of consortium bidding. Turn over criteria to be fulfilled by the consortium members' together. Number of Consortium members is limited to maximum Four members. However, any firm/agency having no prior experience for their proposed share of work (as per sl. No 4.1) shall not be considered as a Consortium member.
4.	Volume – II (Tender Specification – Technical) 02 Intent of Specification Point No. 02.06	It is a green field project, however, the Tenderer may visit the site and satisfy himself before submission of the offer, the nature and location of work place, area available, kind of equipment, facilities, services, etc. needed during actual execution of work, performance of work, general and local conditions as well as all other matters which can, in any way, affect the work covered in this specification. Deviations from Technical Specification (TS) and standards, if any, shall be brought out clearly with proper justifications. The deviations brought out shall be specific in nature. If the deviations from the technical specification or specified standards are not brought out clearly by the Tenderer, the same will not be considered by the Purchaser, even if, directly or indirectly mentioned in any part of the offer. Tenderer may offer certain alternate system/equipment of improved design, if necessary, with clear justification for the same. Technical specification is a guideline to the bidders for basic requirement of the project w.r.t the production quantity and quality. Should the tenderer consider that improved equipment features and additional process equipment configuration are beneficial, then they are invited to put	It is a green field project, however, the Tenderer may visit the site and satisfy himself before submission of the offer, the nature and location of work place, area available, kind of equipment, facilities, services, etc. needed during actual execution of work, performance of work, general and local conditions as well as all other matters which can, in any way, affect the work covered in this specification. Technical specification is a guideline to the bidders for basic requirement of the project w.r.t the production quantity and quality. Should the tenderer consider that improved equipment features and additional process equipment configuration are beneficial, and then they are invited to put forward the same as part of their offer. The perceived

		forward the same as part of their offer. The perceived technical and / or commercial benefits of the additional features should be highlighted in the offer for review and acceptance. However, for evaluation of L1 bidder, cost implication will not be considered for the offered additional features.	technical and / or commercial benefits of the additional features should be highlighted in the offer for review and acceptance. However, for evaluation of L1 bidder, cost implication will not be considered for the offered additional features
